DRESSAGE ARENAS · JUMPS · FOOTING · BARN ACCESSORIES

OFFICIAL VENDOR OF THE 2010 ALLTECH FEI WORLD EQUESTRIAN GAMES

ARENA FOOTING

Premier Equestrian offers a wide range of horse arena footing additives. All our arena footing products are safe, non-toxic and affordable, and will help eliminate dust, reduce watering, and aid in the reduction of stress to your horse's joints and tendons.

ProTex™ Arena Footing

ProTex™ is the newest innovation in equestrian footing by Premier Equestrian. It combines the superior cushioning quality of crumb rubber with the performance enhancing traction qualities of GGT non-woven textiles. The crumb rubber and textile are combined with sand to produce a footing that protects your horse from concussion related injury while providing maximum traction and reducing shear. Because of its moisture retaining qualities this footing also lowers the level of dust in the arena while providing a cushion and a nonslip surface. ProTex is sold by square foot, see the chart below to calculate the square footage of your arena.

ProTex™ Arena Footing .39¢ per sq. ft. (freight additional)

GGT-Footing™ Products

You'll find GGT-Footing™ Products at international horse show facilities like the FEI World Cup and the Winter Equestrian Festival in Wellington, FL. GGT-Footing™ Products are an integral part of the footing system for the 2010 Alltech FEI World Equestrian Games. GGT is a neutral non-toxic, non-allergenic material which will not affect either humans or animals. It has many fine qualities such as:

- Good resistance to compacting.
- Stabilizes sand particles and delivers high elasticity.
- Gentle on the bare hoof with great energy absorption for less concussion.
- High slide strength and intermediate shear resistance delivers additional stability.
- Improves and balances moisture absorption (longer intervals between watering).
- Year-round utilizable through extensive frost security (almost prevents freezing).
- Significant dust reduction for indoor riding arenas!
- Easy to care for and durable (up to 10 years, depending on usage & maintenance).

GGT-Jumping \$1.05 per pound - Designed specifically for horse jumping arena surfaces with optimum impact absorption, higher slide strength and greater stability.

GGT-Dressage .85¢ per pound - Custom blended for dressage horse arenas, higher slide strength and a resilient cushion effect without being too soft.

*Based on 3" of qualified sand. Individual consultation suggested.

ProStride® Arena Footing is our crumb rubber product. ProStride® is formulated to an exacting size specification using several more recycling processes than competing crumb rubber products. This results in a cleaner, more consistent material that stays suspended in your sand footing, not sinking to the bottom or floating on top. Your riding surface will be greatly improved by mixing ProStride with your sand. This provides protection from equine injury by minimizing concussion to your horses legs and tendons. ProStride also helps to reduce dust by minimizing sand breakdown. ProStride is non-toxic, and has been used for over two decades as a playground surface, soil amendment, and for equestrian riding surfaces. ProStride, is clean, easy to install, and will last for up to 20 years.

Suggested amounts: 1/2" of ProStride mixed with sand is the minimum amount to yield benefits. Recommended depth of ProStride and sand not to exceed 2 1/2" - 3". ProStride footing will be delivered to your facility. Lift gates are available for off loading. Mixing and distribution of rubber is the owner's responsibility.

Premier Hydro-Keep is a safe, non-toxic chemical crystal that can reduce your arena watering considerably. The crystals work by rapidly absorbing the water and retaining it. Over time as the soil dries, the water is gradually released from the crystal, hydrating the surrounding area. The crystal expands when watered then contracts as the water is released. As an added benefit, this continuous expansion and contraction reduces soil compaction. Benefits: • Reduces Arena watering • Controls dust by keeping the arena moisture level higher • Lasts up to three years in the soil. Hydro-Keep is very concentrated, and a small amount will cover a large area. **Suggested amount is 10 lbs. per 1,000 sq. ft.**

Premier Hydro-Keep \$6.99 per pound
(25 lb. minimum) Free shipping in contiguous US

GGT-Footing Dust Absorber has been developed for use with our GGT- Dressage and Jumping footing additive. Dust Absorber can absorb 300 times of its volume in moisture and will bind dust for a prolonged period, reducing your watering needs significantly. GGT Dust Absorber is an organic protein crystal mixed with a silica sand base, making it easier to spread more consistently over large areas. Optimizes water use while decreasing your water consumption, while enhancing water distribution more evenly throughout the arena footing. Continuous moisture absorption facilitates more efficient dust control. Absorbs excess water under wet conditions. Effective for both indoor and outdoor arenas. Excellent for new surfaces and can improve existing arena footings. Easy to apply and blend. One 20kg (44 lb) bag will cover 1076 square feet.

GGT-Dust Absorber \$125 (44 lb bag) Freight additional

Footing Sample Kit Our customers rave about this one, the best 20 bucks ever spent. Test your arena and see how footing additives will improve your riding surface! Our sample kit includes enough ProStride, ProTex, GGT Textile and Arena Hydro-Keep to do a five gallon bucket experiment, giving you all that you need to make decisions related to arena footing, installation, and maintenance. Every kit ships with a coupon good for \$50 off any purchase of \$500 or more of any Premier Equestrian product. **Sample kit includes: ProStride crumb rubber sample, Arena Maintenance and Installation DVD, ProTex rubber/textile blend sample, GGT footing sample, and a Hydro-Keep arena hydrator sample.**

Parma Arena Groomer

The PARMA® Arena Groomer® has been proven in arenas and on tracks for all events that require good footing. Its ability to prepare your footing as well as the condition the top surface in one pass can improve the performance of your horse and save stress on his legs at the same time.

The unit uses vibrating "S" tines that can be set to your desired digging depth. Following the tines is a leveling bar that will shave off high spots and fill in any holes as you pass over the arena. To the rear of the machine is a roller that conditions and flattens the surface and also gauges the depth of the tines, leaving a uniform finish on your arena. The Parma mini groomer can be easily pulled by any small lawn tractor or 4 wheeler with 21 HP or more. The Tongue and Screwjack attachment enables you to raise and lower the tines to simulate a 3 point hitch.

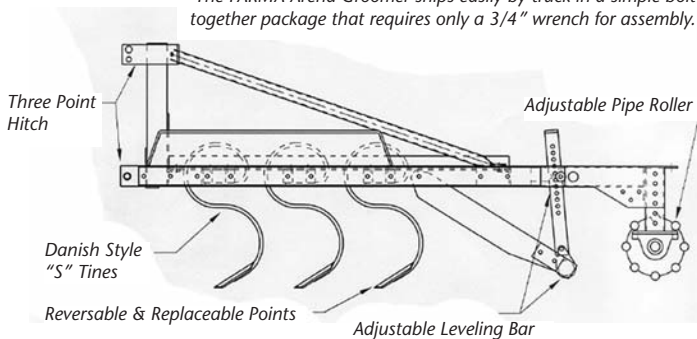

The Parma Arena Groomer is great for mixing all types of footing including textured fiber, felt, rubber and textile footing ammendments. Includes a one year warranty.

Parma Standard Arena Groomer side by side with the Parma Mini-Groomer

Tongue and Screwjack for pulling without a 3-point hitch

The PARMA Arena Groomer ships easily by truck in a simple bolt together package that requires only a 3/4" wrench for assembly.
